## Seamless Silikal® flooring for the Königssee fish farm

The Königssee fish farm's premises in Berchtesgaden offer hygienic and safe working conditions, in which floor coatings from Silikal® reactive resins play an essential role. The seamless, exceptionally low maintenance flooring provides clean, robust and slip-resistant floor surfaces in all areas of fish processing.

Extremely durable and resistant against cold temperatures and wet

conditions, the acrylic coating is perfectly suited to all aspects of fish processing, including filleting, smoking and selling. Interspersed with blue or green coloured quartz, the flooring doesn't just look good, but it also provides surfaces with a high degree of stability. Coving around the edges prevent the accumulation of dirt in corners and facilitate thorough cleaning.

*Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.*
