

Because it has proven itself:

# Silikal floors for the “Fuchshof” at Lake Constance

Expect more from your floor.

## Once again, a decision for a reactive resin flooring – thanks to the previous good experience.

There is a farm products shop that could be from a storybook at the "Fuchshof" at Lake Constance. Fruit, bakery products, jams and juices – all made from the farm's own produce. When extension and renovation work was necessary there, the owners, the Fuchs family, fell back on proven products. The floor of the sales shop and the neighbouring working areas were given a reactive resin coating of Silikal.

The owners have had the best experience with the pore-sealant Silikal coating for the last 17 years. The cleanliness and the load bearing capability are convincing, says the scion of the owner,

Florian Fuchs. This particularly applies to the sensitive handling of foodstuffs. And therefore, there was no question of using anything else other than Silikal systems in the newly designed farm shop and the neighbouring preparation area for the bakery. And that too, incidentally, in the shortest time: After just two days, the job was completed.

A total of 260 square metres of Silikal coating was applied, with scattered flakes, slip-resistant and visually attractive, in the colour combination brown/red/beige.

*Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.*
